

THE WESTERN REACH

ABELON

A Guide to Setting Up Your Character in DiceCloud

Before the adventure begins in Tallowhaven, your character needs a home. DiceCloud is the character sheet platform we use for this campaign. Follow these steps carefully and you'll be ready for Session Zero.

1 CREATE YOUR ACCOUNT

Head to **dicecloud.com** and create a free account. Once logged in, you're ready to set up your character sheet.

2 CREATE A NEW CHARACTER

Navigate to the **Characters** tab in the sidebar and click the large red **+** button in the bottom-right corner. Fill in your character's name, gender, and other basic details, then click **Create**.

Don't stress about locking anything in at this stage — all of this can be changed later.

3 READ (OR SKIP) THE TUTORIAL

After creating your character, DiceCloud will offer you an in-app tutorial. It's worth reading if this is your first time in v2 — it explains the slot-based build system well. When you're done (or ready to move on), click the **delete icon** next to the "Introduction to DiceCloud V2" card to dismiss it.

Note: *You can always revisit the tutorial later via the Sources panel.*

4 SUBSCRIBE TO THE RIGHT LIBRARIES

This is the most important step. DiceCloud uses *libraries* — community-built collections of rules, classes, races, spells, and items — to populate your character sheet. Without the right ones, your Build tab will be almost empty.

On your character's Build page, click the large red **Sources** box at the top. Click **Browse Community Libraries**. You'll see a list of available libraries — first, **unsubscribe from the DiceCloud 5th Edition SRD** (the default), then find and subscribe to **Tameran's Library of Everything (2024)**.

Why Tameran's? *It's the most complete and actively maintained 5e (2024) library, covering classes, species, backgrounds, spells, and items through a suite of interlinked sub-libraries — all set up to work together out of the box.*

Once you've subscribed, return to the Sources panel and click **Insert**. On the next screen, select the following bundles:

- ♦ **# Bundle: Core Sourcebooks** — PHB, DMG, MM
- ♦ **# Bundle: Core Supplements**
- ♦ **# Bundle: Setting Supplements (2024)**

- ◆ **# Bundle: Additional Character Options (2024)**

Click **Insert** at the bottom when done, then close the Sources panel by clicking the red X.

5 FILL YOUR CHARACTER'S SLOTS

With your libraries loaded, your Build page will now show a series of red boxes — these are *slots*, waiting to be filled. Think of each one as a blank on your character sheet that DiceCloud wants you to complete. Click the + button on each slot to make your selection.

Work through the following in order:

- ◆ **Species** — select your species
- ◆ **Background** — select your background
- ◆ **Starting Class** — select your class and subclass when prompted
- ◆ **Spell Slot Structure** SPELLCASTERS ONLY — select *Jon's Spell Slot Structure* (it should be the only option shown)
- ◆ **[JSSS] Spellcasting Type** SPELLCASTERS ONLY — select *Spellcasting*

Tip: Most slots are self-explanatory. Work through them top to bottom and click all the red boxes until they disappear. If you're unsure about a choice, make your best guess — we'll go through characters together at Session Zero.

6 SET YOUR EXTENSIONS

There will be an **Extensions** slot on your Build page. Click the + and select all four of the following:

- ◆ Dice Roller
- ◆ Show Temp HP
- ◆ Automatic Hit Dice
- ◆ Inspiration Checkbox

You can close the Extensions slot once those three are selected.

7 SET BASE ABILITY SCORE METHOD TO MANUAL

Find the **Base Ability Score** slot and set it to **Manual**. Leave the actual scores blank for now — we'll be rolling stats together during Session Zero, so nothing to fill in here yet.

At this point, your Build page should show exactly three remaining red boxes: Base Ability Scores, Extensions, and Multiclass. That's correct — you're done with the Build tab.

8 CONNECT TO THE CAMPAIGN DISCORD SERVER

This links your DiceCloud rolls to our Discord server so everyone can see them during play. Here's how:

- ◆ From your character sheet, click the **three-dot menu** (top right)
- ◆ Select **Edit Details**
- ◆ Scroll down and open the **Settings** section
- ◆ Find the **Discord Webhook URL** field and paste in the following:

```
https://discord.com/api/webhooks/1504109502155460689/raA  
1xUG0J782n9QT2YBPf7284cXwVLNpQlyQP0yp_MHR4eyS-dkcgWE8KGC  
cpXJlL5uR
```

- ♦ Click **Done** to save

What this does: Any dice rolls made from your character sheet will automatically post to the campaign's Discord channel, keeping everyone's rolls visible and accountable at the table.

9 FILL IN WHAT YOU KNOW

Head to the **Journal** tab on your character sheet. Feel free to write in as much or as little about your character as you like — backstory, personality notes, appearance, motivations. Nothing here is final. Think of it as a sketchpad for your character concept ahead of Session Zero.

The Stats, Features, Inventory, and Spells tabs will populate automatically based on your slot selections. Take a look around — it should already feel like a real character sheet.

SHARE YOUR SHEET

Once you're set up, please share your character with the DM using either of the following methods:

OPTION 1 — SHARE A LINK

*Click the three-dot menu → **Sharing** → set to "Anyone with a link". Drop the URL in your private channel.*

OPTION 2 — SHARE DIRECTLY

Use the Sharing menu to share the character directly with the DM's username:
